O1

EXPERIENCE

O2

Frontend Engineer - DSS Network

July 2024 - present

Developed and implemented a complex web application for a mystery shopping platform, covering administration, user (collaborator) management, and client service modules. Took ownership of core business logic in collaboration with another frontend developer.

- Led a team of four, coordinating and supervising frontend development.
- Designed and implemented business logic and user interfaces using React and Next.js.
- Managed global state with Zustand and handled API integrations with Axios and React Query.
- Assigned tasks, solved technical challenges, and delivered features on schedule.

Technologies : React · Nextjs · Javascript · Zustand · React Query · Axios · Biomejs

Freelance

October 2023 - December 2024

Comprehensive development of a website EMESE, for a wellness center, focusing on user experience and search engine optimization.

- Implemented advanced **SEO** practices to improve online visibility.
- **Designed** and **prototyped** the user interface in **Figma**, ensuring an attractive and consistent experience.
- Collaborated with the client to understand their needs and ensure satisfaction with the final product.

Technologies : NextJS · TypeScript · Zustand · TailwindCSS · Git · Figma

Software Engineer Internship - NTT Data

March 2023 - June 2023

Developed a web application to manage incidents for **Inditex's** physical stores worldwide :

- Conducted unit testing with **JUnit** and **Mockito** to ensure code quality and functionality.
- Created **DTOs** through an **API** to encapsulate them in the project, enhancing efficiency and clarity in communication between project components.
- Mapped entities to transfer only necessary information from the backend to the presentation layer.

Technologies : SpringBoot · Java · Maven · MySQL · Jira · JUnit · Mockito · React · TypeScript
